

AUTHORISED SUB-PROCESSORS AND AUTHORISED TRANSFERS OF PERSONAL DATA

Last updated October 20 - 2022

PROS Cloud, Support & Professional Services Sub-processors

We use sub-processors to perform certain technical, administrative and support functions required in the provision of our Subscription Service and related professional services, including consulting and training (the “**Services**”). A sub-processor is a third-party entity that has or may have access to or may process personal data. “**Personal data**” is any information relating to an identified or identifiable natural person and may include such person’s name, email address, or other contact details. Prior to engaging a sub-processor, we complete robust transfer impact assessments to evaluate the security, privacy and confidentiality practices of a sub-processor to determine that they are adequate to meet our security requirements in the performance of the Services.

A list of PROS sub-processors is located below. Each of the PROS sub-processors processes information on behalf of PROS for some, but not necessarily all, PROS Services. If you would like more information about which sub-processors process data with respect to the PROS Services that you use, please reach out to your designated PROS Customer Success Manager. PROS will update this list regularly and inform you of any updates in accordance with the terms of your agreement with PROS.

1. This list applies to the following PROS Travel solutions:

<ul style="list-style-type: none">• PROS Market Valuation Module (MVM)	<ul style="list-style-type: none">• PROS Group Sales Optimizer (GSO) (Advantage / Ultimate / Essentials)
