Other Product Configurations

Fare Sources (Applicable across Verticals)

airTRFX System Scope	FareNet and Additional Sources of Pricing Data*	Static Content via Excel Uploads
Full System	X	
Standard Pages	X	
Custom Pages	X	
Custom Pages Premium	X	
Basic		X

* Scope of work and associated fees will be assessed if additional sources of fares need to be included and are available for consumption as per PROS requirements. Any additional source of fares will be implemented after initial product configuration and production release

Configuration for Initial Production Release (Applicable across Verticals)

airTRFX System Scope	Cabin Classes	Trip Types	No. of Languages
Full System	Economy	One way or Roundtrip or Combined	1 or 2
Standard Pages	Economy	One way or Roundtrip or Combined	1 or 2
Custom Pages	Economy	One way or Roundtrip or Combined	1 or 2
Custom Pages Premium	Economy	One way or Roundtrip or Combined	1 or 2
Basic	N.A.	N.A.	1 or 2

- Any subsequent languages, cabin class or trip type are subject to an additional monthly subscription fee by licensing Expansion Sets from Data Core products.

- Any subsequent languages will be delivered in sets of 2, every 6 to 8 weeks after initial product production release.

Web Delivery (Applicable across Verticals and airTRFX System Scope)

- airTRFX will be released to customer's production domain via Subdirectory or Subdomain.
- If subdirectory is selected, customer must have a Content Delivery Network (CDN) on which the reverse proxy rules will be set up for delivery of airTRFX to the customer website domain. Without a CDN on the customer website, this option is not technically feasible.
- If Subdomain, customer must delegate a subdomain to PROS. Any SSL Certificates and Subdomain creation costs will be covered by Customer
- Customer can migrate from any of these options (from Subdomain to Subdirectory or Subdirectory to Subdomain) at any point after initial production release. Feasibility, scope of work, timelines and associated fees will be assessed as per PROS requirements.

API Integrations (Applicable across Verticals and airTRFX System Scope)

- No API integrations will be included during initial product configuration and production release
- Any additional API will be charged separately and will be scheduled after initial product configuration and production release
- Feasibility, scope of work and timelines will be assessed based on the API to be integrated

airTRFX Control Access (Applicable across verticals and airTRFX System Scope)

- Access to airTRFX Control (System Management Portal) with unlimited users

airTRFX Add-Ons

Unlock enhanced capabilities with our suite of premium add-ons, available for integration with any airTRFX product. Each add-on is licensed separately and may require additional implementation steps to ensure optimal performance and customization.

- **Premium Widget Library**
  - **Description**: The **Premium Widget Library** is an advanced feature bundle designed to complement and elevate the core airTRFX product. This add-on unlocks access to a curated library of high-performing, customizable widgets that enhance the functionality, interactivity, and user experience of airTRFX pages. Built to meet the dynamic needs of modern airline marketers, the Premium Widget Add-On enables greater flexibility in page design, deeper personalization capabilities, and improved conversion potential - empowering teams to deliver more engaging and effective traveler experiences.

- **Includes**: Access to all current and future widgets released in the Premium Widgets Library as they become available. These widgets are designed to elevate both the user experience and overall page performance, supporting areas such as SEO and AI Search optimization through rich, structured destination content. For example, the Quick Facts Widget provides dynamically generated destination insights that enhance content quality and contribute to stronger visibility in SEO and ASO rankings.
- **Licensing Requirement**: Must be licensed as part of the Premium Widget Library Bundle.

Marketer AI Agents

The **airTRFX AI Agents** are designed to transform the marketer's workflow by bringing intelligence, personalization, and efficiency into every interaction. By automating repetitive tasks and surfacing best practices, these AI Agents reduce setup time and help marketing teams quickly launch promotional pages with integrated pricing modules. This frees marketers to focus on strategy, creativity, and driving results.

This capability is evergreen: any AI Agent launched within airTRFX Control is included, ensuring continuous innovation. Current examples include the Dynamic Price airModule Creation Agent, the Offer Marketing Chatbot, the Widget Creation Agent, the Module Translation Agent and the Interlinking Generation Agent; powerful tools that streamline pricing updates and conversational engagement. As new agents are introduced, they are automatically available, keeping your marketing stack future ready.

Accessibility Compliance

PROS products are designed and developed in compliance with WCAG 2.0 - AA accessibility standards to ensure usability for all individuals, regardless of their abilities. This commitment to accessibility ensures that our products meet the needs of diverse users while adhering to recognized industry guidelines.

The **Web Content Accessibility Guidelines (WCAG),** published by the **World Wide Web Consortium (W3C)** through the **Web Accessibility Initiative (WAI)**, provide a framework to make web content more accessible. These guidelines are designed to support individuals with disabilities, while also offering benefits to users on devices with limited capabilities, such as mobile phones.

WCAG 2.0 defines three levels of accessibility conformance:

- Level A (basic requirements)
- Level AA (intermediate)
- Level AAA (highest)

Higher levels of conformance automatically include compliance with lower levels.

Customers are responsible for ensuring proper color contrast of all components in accordance with the specified PROS Design System colors and fonts. PROS do not guarantee accessibility compliance for user-generated content, such as custom assets.

Browser Compatibility

PROS will support browser compatibility of its products across browsers that, in aggregate, account for at least 99% of the traffic to the customer's instance of the products over the past twelve (12) months, reviewed annually.

PROS reserves the right to adjust supported browsers to maintain compatibility, adhering to the minimum threshold stated above.

Following the list of widely used and supported browsers:

- Google Chrome v90+
- Safari v16+
- Android Browser
- Firefox v15+
